DETAILED ACTION

1. In view of the amendment filed May 10, 2007, claims 1-31 have been cancelled, and Claims 32-53 have been added. Claims 32-53 are pending.

2. In view of the amendment filed May 10, 2007, the rejection of Claims 32-53 under 35 U.S.C. 102(b) as being anticipated by Inukai et al. (US 5,149,753), is withdrawn. Further, the rejection of Claims 12-15, 27-31 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Inukai et al. (US 5,149,753), is withdrawn.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Application/Control Number: 10/538,266

Art Unit: 1713

2. Ascertaining the differences between the prior art and the claims at issue.

3. Resolving the level of ordinary skill in the pertinent art.

 Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 32-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inukai et al. (US 5,149,753).

Inukai et al. (abstract; col. 2, line 15 to col. 3, line 65) disclose a fluoroalkyl methacrylate(structure III)/MMA composition and its application as optical fiber (cladding materials). Regarding the claimed "weight average molecular weight of from 10,000 to 1,000,000", the examiner has a reasonable basis that the claimed molecular weight feature is inherently possessed in Inukai et al. in view of its claimed broad molecular weight range.

The difference between the invention of claims 32-53 and Inukai et al. is that Inukai et al. are silent on the mole percent of the fluoroalkyl methacrylate (I) of claim 1 as claimed.

However, Inukai et al. (abstract; col. 2, line 15 to col. 3, line 65) clearly disclose a fluoroalkyl methacrylate(structure III)/MMA composition, however has a lower amount of fluoroalkyl methacrylate as compared to the amount fluoroalkyl methacrylate as claimed. Motivated by the expectation of success of lowering the turbidity of the copolymer, which is presumably caused by the fluoroalkyl methacrylate having a long molecular chain, it would have obvious to one of ordinary skill in art to lower the amount

Application/Control Number: 10/538,266

Art Unit: 1713

of fluoroalkyl methacrylate having a long molecular chain such as the fluoroalkyl methacrylate compound (I) of Inukai et al. (col. 2, line 33-41) in favor of the higher amount of fluoroalkyl methacrylate compound (III) of Inukai et al. (col. 2, line 57-63) to obtain the mole percent composition of the fluoroalkyl methacrylate composition as claimed.

Further, in view of the substantially identical composition as taught in Inukai et al. as compared to the composition as claimed, the examiner has a reasonable basis that the claimed glass transition temperature, refractive index, and fluorine content features are inherently possessed in Inukai et al. Since the PTO does not have proper means to conduct experiments, the burden of proof is now shifted to applicants to show otherwise. In re Best, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977); In re Fitzgerald, 205 USPQ 594 (CCPA 1980).

Regarding the structure of claims 40, 41, 49,51-53, Inukai et al. (col. 2, line 44-55) clearly disclose a fluoroalkyl methacrylate having the value of m ranging from 4 to 10, which fully encompasses the structures as claimed.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William K. Cheung whose telephone number is (571) 272-1097. The examiner can normally be reached on Monday-Friday 9:00AM to 2:00PM; 4:00PM to 8:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David WU can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
